

# performance & security

The whole philosophy of the Platinum Collection has been built around performance achieved through testing. The materials used in the construction of the door have been individually tested to ensure long term performance. The use of the triple seal coupled with an effective threshold ensures exceptional weather performance.

Security features include a three hook locking system, dog bolt hinges, tough polyurethane core reinforced with steel mesh all as standard. Additionally, security has been further enhanced by incorporating 6.4 mm laminated glass, door security chains and handles using split spindles. This comprehensive security package conforms to the best security standard at use in the market today, as represented by the 'secure by design' brand. A specially formulated thermoplastic skin material developed to promote UV stability, high thermal shock and scratch resistance, provides an effective barrier for the door.

ISO 9001:2000

As one would expect, such a product has been manufactured under the British Standard quality assurance system.

## Glazing

Sealed glazing units have been manufactured to the European Standard of EN1279 using toughened glass manufactured to BS6206.

## Secure by Design

Being a licence holder for the prestigious 'Secure by Design' assures the effectiveness of the

Three adjustable 'dog bolt' flag hinges which effectively secure the door sash to the outer frame when in the closed position.

Glazing cassette incorporating 28mm laminated glass sealed unit.

Three point hook lock with latch and choice of lever or pad handles incorporating split spindle.

Laminated timber sub-frame sealed with a specially designed thermoplastic edge incorporating a steel reinforcement mesh embedded in the polyurethane foam core.

Platinum Collection.  
PAS 23 - 1:1999 Part 1

The standard for general requirements for door assemblies as set by 'PAS 23 - 1:1999 Part 1' has been met. Provides weather-tightness up to gale force nine.

PAS 24 - 1:1999 Part 1

The standard for enhanced security performance for door assemblies as set by 'PAS 24 - 1:1999' has been met.

Low Mobility Threshold (standard)

# discover exquisite design and enhanced security

# the Platinum Collection

# the Platinum Collection

Building upon a high performance door, the platinum collection has added the two distinctive features of enhanced Design and Security as part of its standard offering. A superb range of door styles available in three subtle tones of white, now incorporate a choice of beautifully crafted glass bevels or natural externally fitted Georgian bars. When further adorned by a range of stylish quality accessories one can truly appreciate what simple yet classic design means. Security, a critical aspect of any door choice, has been further enhanced, meeting all of the security performance standards required, when supplying doors under the 'secure by design' licence.
